

## Community Grants Available

Community grants are now available from the PREVENTABLE trial. These mini-grants are designed to provide support of educational outreach strategies to diverse communities around disability, dementia or healthy aging. We are seeking non-profit and community-serving organizations, faith based organizations, tribal nations and other organizations to assist us in expanding our reach to engage those interested in participating in the National Institute of Health (NIH) funded Pragmatic Evaluation of Events and Benefits of Lipid-lowering in Older Adults ( PREVENTABLE [preventabletrial.org](http://preventabletrial.org)) trial.

These awards will provide financial support to community groups with trusted relationships and demonstrated success in engaging seniors in underserved communities, as a complement to local PREVENTABLE Study site engagement efforts, to allow community stakeholders to propose use of novel engagement strategies to effectively engage minority and rural communities around the PREVENTABLE trial. Priority will be given to applicants with demonstrated success in reaching communities of color and rural communities.

### Applications due: July 15, 2021

Please see the table below and view the [information webinar](#), recorded on June 10th, 2021.

Learn more and apply.
